EDUCATION

University of South Florida

Tampa, FL

B.S. in Computer Science – GPA: 3.98/4.00

Expected Graduation: May 2028

SKILLS

Languages: Python, Dart, TypeScript, JavaScript, C++, SQL, C

Frameworks: React, Node.js, Flutter, Django, Tailwind CSS

Developer Tools: Git, Azure DevOps, Datadog, REST APIs, Firebase, Google Cloud, AWS, Riverpod, Figma

Relevant Coursework: Data Structures & Algorithms, Program Design, Discrete Structures, Computer Architecture

WORK EXPERIENCE

Software Engineer Intern | Dart, Flutter, Firebase, AWS, Riverpod, Azure DevOps

Jun 2026 – Present

BTG Pactual

Sao Paulo, Brazil

- Developed production-ready **Flutter** features for BTG Empresas in an **Agile Scrum** environment, applying object-oriented design principles to support foreign-exchange operations for corporate clients.
- Designed and shipped the mobile frontend architecture for a foreign-exchange documents hub serving **100K+ business clients**, translating compliance requirements into production software across four document workflows.
- Reduced initial document-listing network requests by **75%** by replacing eager loading across three OData feeds with on-demand data fetching, improving application performance and reducing network traffic.
- Integrated six REST/OData and PDF endpoints with AWS services, validating production readiness through **~75 BDD scenarios** and **187 unit tests** while supporting **Azure DevOps CI/CD** workflows.

Head of Technology | React, Node.js, Dart, Flutter, Firebase

Jul 2025 – Present

BRASA Connect

Tampa, FL

- Led a cross-functional team to deliver a unified event-management platform for **360+ conference participants**, architecting parallel **React/Node.js** and **Flutter** web clients on shared **Firebase** infrastructure.
- Architected a mentorship module featuring automated scheduling, a profile-matching algorithm, and Firestore-based real-time sync, facilitating **200+ mentor meetings**.
- Led the implementation of an NFC-powered networking system that enabled **1,930+ attendee connections** and managed Firebase cloud infrastructure supporting **300+ student resumes**, recruiter profiles, and event registrations.

PROJECTS

NovaBay | React.js, Python, SQL, GIS APIs

Apr 2026

- Developed a MapLibre GIS platform for real-time flood risk and coastal viability analysis using live government APIs and Claude AI, winning **HackUSF's Climate Teach-in Sustainability Challenge** out of **80+ teams**.
- Built an interactive blueprint sandbox backed by Supabase, querying **50K parcels** and generating real-time sustainability and flood resistance scores for urban planning analysis.

RentEscrow | Solidity, Python, Next.js, TypeScript

Mar 2026

- Developed a decentralized escrow protocol on Ethereum Sepolia with Solidity smart contracts featuring a **five-stage lifecycle**, integrating Aave yield generation for rental deposits and enabling secure cross-border agreements.
- Built a Next.js frontend with wallet connectivity and real-time on-chain state sync, backed by a Dockerized Python FastAPI indexer and validated through MetaMask transactions across all **five protocol stages** on the Sepolia testnet.

Free Food Newsletter | Python, APIs

Mar 2026

- Built an automated scraper using Python and Selenium to monitor **40+ USF events** weekly, leveraging OpenAI and Perplexity APIs to identify and surface free food opportunities for students.
- Automated a newsletter pipeline delivering AI-powered alerts to **60+ subscribers** through scheduled workflows and secure API key management.

ACTIVITIES & LEADERSHIP

Professional Development Analyst | Brazilian Student Association at USF

Jul 2025 – May 2026 | Tampa, FL

- Planned and delivered **10+ professional development events**, including corporate speaker sessions and workshops.
- Developed a career services platform and coordinated a mentorship program serving **80+ participants**.
